

# The Path to SUCCESS

**F**ailures are the stepping stones to success." It is rightly said, "Success comes to those who dare and strive hard for achieving it". We may experience failures but should not quit and keep striving harder until we achieve our goal.

"Expect more, get more. If you expect failure you can get that too." In our life, our beliefs also have a great importance. We should not think negative. Positive beliefs always stimulate our action and make us confident. We should always think

about our goal and get motivated to work further. Believing in you is the first step to attain success.

When we walk on the road to success, there are many temptations, which prevent you from doing what we should do for our successful life. We should stay away from such things and be singly focused on our goal.

"Patience has its reward". Success is not an overnight miracle. India took several years for attaining its freedom. It was only possible because of the efforts that were put for years and people's patience.

Another vital step towards success is having "Self confidence". Even to do the smallest things in our every day life we need self-confidence. Be it taking up a responsibility or a decision. Having self-confidence is the first step to success. No confidence, no success! When ever you are knocked down by someone think like a boxer, if you do not get up it ten seconds everything is over" so get up quickly and keep fighting!

Keep trying. Never, ever give up!

### The role of youth in realising the dreams of Dr Kalam

**Y**outh are the backbone of any nation. They can change the future of the society with their efforts and courageous behaviour. Unfortunately and most

of the time, today's youth are least bothered about the society. They are interested in doing other things instead of improving themselves. As a result, they lack focus, vision and dreams which will drive them towards success. Therefore to harness their resources, we must motivate them and teach them their responsibilities.

of the best places to live in and which brings smiles to billion faces and also realise the dreams of our former President, Dr APJ Abdul Kalam, a dynamic and versatile person. Therefore, the best tribute to Dr Kalam would be following his ideals and taking our country on a progressive path. To do that, everyone must understand and master three mighty forces - desire, belief and expectation!

They must remember Dr Kalam's speech on 'Youth dynamics and the nation' which stresses role of the youth in shaping and changing the destiny of the country. Dr Kalam showcased his vision of an empowered, self-sufficient India that shines in its full glory.

The path to this glorious future can be paved only by us-youth of our nation. They play a crucial role in the endeavours for equality and justice. They must assimilate from the very beginning the lessons of self-help, self-reliance and self-sacrifice. Youth should be like jawans and take up arms against corruption and never indulge in illegal activities.

We the youth should maintain unity in diversity and national integration. We should make people realise the ideal 'One Flag, One Nation, One Land, One Hand, One Heart evermore', which would eventually lead the country to the pinnacle of success. Women constitute most pivotal role for upliftment of our country. We should accept equal participation of women in all fields. Dr Kalam said "Never stop fighting until you arrive at your destined place, this is a Unique You!"

According to him knowledge, creativity, righteousness,
